I sent a summary of permit changes to Leslie and hope that will help her to draft her letter. She used to provide a summary of permit conditions/changes in her letter. I will follow up with her soon.

Have you heard back from Louisiana and Texas on Coastal Zone concurrence? Any news on EFH?

Ok, Brent. So, we eRoute the final package Tuesday? I plan to work at the office Tuesday so we may go thru any outstanding issues face to face before sending the final package out. Because each division staff already reviewed and commented on the draft final RtC and permit, it shouldn't take too long for them to concur, I hope.

Tuesday should work. I was thinking something like:

U.S. Environmental Protection Agency
Compliance Assurance & Enforcement
Surface Water Compliance Section (6EN-WC)
Attn: OCS General Permit
1445 Ross Ave, Suite 1200
Dallas, TX 75202-2733

Note: just an example, I pulled address from your signature line and did not hunt up the real address in the permit.

Brent,

I think that is a good idea but not sure it would make much difference. However, in thinking out loud I'd like to at least have a discussion with Sharon so it doesn't appear that I ignored her comment on having more specifics on the mailing address to avoid them "getting lost"

Ok if I get something to you by Tuesday?

I suppose you could add something like "Attn: OCS Coordinator" or "Attn: Offshore Coordinator" or something.

Thank you so much Brent for sharing.

I wanted to see if we could set up a separate mail code but it does not appear as if we would be able to do so. I too have your concern that by putting somebody's name, it would cause confusion/challenges if that individual left the agency and/or position. I therefore will ask that it remains the way you currently have it (e.g. Water Enforcement Branch (6EN-WC))

Thanks!!!

Esteban:

Here is a pretty much final version of the OCS permit. You had mentioned wanting to confirm correct addresses for submittals to R6. Any last minute changes?

Deborah

Here is a clean copy of the draft final permit. There could be some more minor editorial/typo changes, but this is pretty much done.
